

MOTORIZATION solution for trolleys and cabinets

PRATICIMA
healthcare solutions

▶ Medical staff widely suffering from **MSD***

MSD

First reason for sick leave

13%

Rate of absenteeism in healthcare facilities

Medical staff walk between **10 to 15 kms a day**, having heavy trolleys or cabinets to handle.

Handling a medical cart may be difficult due to bend and elevator thresholds. Medical staff makes also multiple stops due to patients' requests. This requires additional physical efforts and often leads to **improper postures**.

Handling a cart or a cabinet implies to lean the body forward, which may cause diseases, like lumbago, shoulder pain... The medical staff is largely suffering from musculoskeletal problems (MSD).

* MSD: musculoskeletal disease

Move of heavy load implying improper work posture

Musculoskeletal problems

Sick leaves

Non productivity: cost for the facility

▶ STOP to manual handling: motorize your trolleys and cabinets!

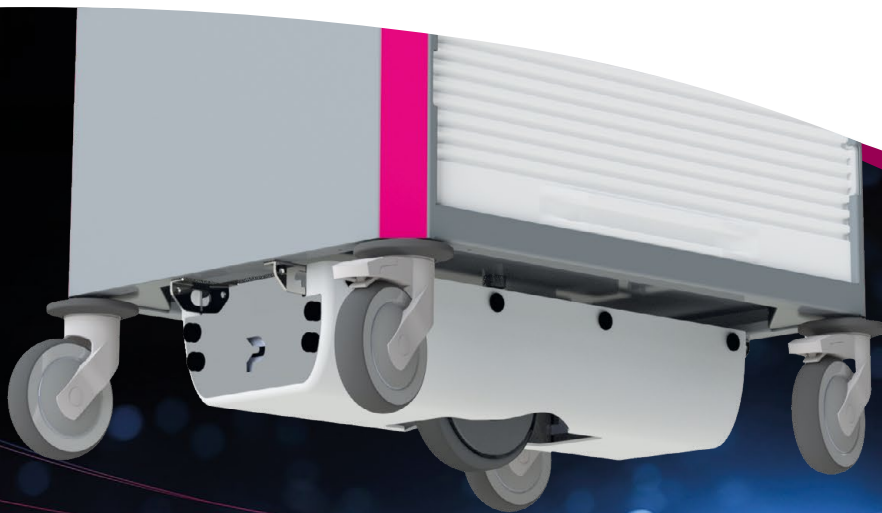

Is medical staff in your facility **exhausted by handling trolleys and transfer cabinets?**

Limit MSD and improve the productivity of your staff by equipping your trolleys and cabinets with the EasyMoove® or EasyMoove®+ motorization system. This innovation will remove push efforts done by the users.

Control of the motorization is done very easily with one hand. Medical staff will benefit from **optimal working conditions.**

- + 100% motorized driving
- + Excellent manoeuvrability
- + Easy to use and to charge the batteries

- + Progressive acceleration
- + Large autonomy of the battery:
manual mode possible in case
the battery has not been charged
- + Adaptive system for irregular floors

easy moove

easy moove⁺

The EasyMoove® motorization solution is designed for medication distribution, care or hygiene trolleys.

- + Two available speeds: 2,5 ou 4 km/h
- + Emergency stop button
- + Maximum possible load: 70 kg

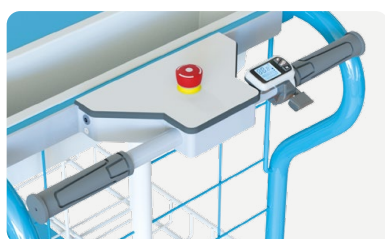

Motorization of Neop® medication and care distribution trolleys

Make the distribution of medication and care easier with our 100% motorized Neop® trolleys. This solution is available for trolleys with a height of 100 or 120 mm.

Motorization of higiene trolleys

Higiene trolleys can weigh up to 70 kg at the start of a tour. That is why motorizing higiene trolleys is essential to improve the staff working comfort.

The EasyMove®+ motorization solution is designed for heavier structures, such as transport cabinets and meal distribution trolleys.

- + Forward or reverse, with gradual acceleration to reach 3 km/h
- + Brake system in case of release of the control buttons
- + 2 LED strips to indicate that the structure is moving
- + Maximum possible load: 200 kg

Motorization of Neop® transport cabinets

With our 100% motorized transport cabinets, **the transfer of medicines or medical devices from the store to the care units becomes really easy!**

This motorization solution is available for Neop® transport cabinets with a height of 160 or 180 mm.

Controls integrated into the crossbars: driving possible by right and left-handed people

Motorization of Neop® Meal distribution trolleys

Make meal distribution easier with our 100% motorized meal carts!

Controls integrated into upper edges

Centralized Braking

▶ Additional solution in order to reduce the MSD

Transfer boards
to transfer patients
without having
to lift them

Electrical pill crushing
to avoid manual
crushing

ERGONOMICS accessible to all!

Our solutions to prevent from musculoskeletal disorders enable a return on investment by limiting costs related to sick leave for healthcare staff.
